Re: Testimonial from Xede Australia

Dear Sirs,

Over the past ten years Xede Australia and its directors / staff have worked exclusively with Stewart Silver King & Burns (SSKB) on all of their project's strata titling, volumetric titling, and body corporate and bulk energy requirements.

The team at SSKB have proven to be commercially adept, capable and reliable partners to the process on each of our projects and are always at the forefront of the latest legislation and practical solutions drawn from their expansive network of operations across Queensland and Australia.

Their involvement with and the intricate knowledge of the highly complex and differing requirements of state by state legislation has also provided us with a stable and reliable platform to work from when venturing into such contrasting areas of legislation.

We are constantly being approached by numerous competitors to SSKB and unfortunately for them our reply maintains that we are very satisfied with the levels of service, professionalism and integrity that SSKB have and continue to provide and we have no reason to change.

We highly recommend SSKB to any prospective client seeking services for which they can provide.

Yours Sincerely
Xede Pty Ltd

Rod Fidler
Managing Director
